

POLE PADDING

This product is designed to cushion poles and posts for a variety of applications, indoors or outdoors.

Installation:

1. Cut the tubing to height using a fine serrated knife or a bread knife.
2. Fully cut through the pre-scored tubing.
3. Open the tubing and wrap around pole.
4. Secure tubing with cable ties every two feet. If the cable ties are not long enough, connect the cable ties before securing the padding.
5. Use scissors to trim the cable ties.
